Our Services

The iFish Group (IFG) is an Information Technology strategy and consulting firm. Since our founding in 2008, we have established a proven track record of delivering successful implementations of business-driven technology solutions for both government agencies (extensively for State of California) and private-sector clients.

ifg Strategy and Consulting

IFG provides Information Technology strategy and consulting services to drive and expedite successful business outcomes.

We offer a variety of consulting services that span the IT life cycle to help our clients solve problems, reach their goals, and create sustainable business value from their IT investments. The IFG Consulting team will leverage industry best practices to deliver predictable results that align with your organization's IT initiatives with business strategies.

Management Consulting
- Strategy Consulting
- Technology Roadmaps
- Organizational Change Management
- Business Process Reengineering

Security Consulting
- Information Security
- Security Operations (SecOps)
- Information Security Governance, Strategy, and Implementation

Project Management
- Agile Project Management & Coaching

Application Development, Delivery, and Maintenance

ifg Technology Solutions

IFG is partnered with industry-leading manufacturers to help clients procure known and trusted technology solutions and products. IFG specializes in Application Security Services. Businesses can often deploy application security software in lieu of developing security practices and processes, leaving gaps in the efficacy of the department's security program. IFG provides a broad range of Application Security products and services to help maturation of their protection efforts.

Strategic Manufacturing Alliances and Technology Solutions Partners
- Broadcom (formerly CA)

ifg Hosting and Managed Solutions

IFG Hosting and Managed Solutions allows your organization to outsource your applications and related infrastructure to our support team, enabling you to focus on your core competencies and business goals without concern for the maintenance of their IT environments. We bridge the gap between your business objectives and your information technology capabilities by providing a one-stop shop catalog of full-service offerings across the software development lifecycle. We offer on-premise, hybrid, and cloud-based subscription models.

ifg Professional Resource Management

IFG Professional Resource Management partners with our public and private sector clients nationwide to understand their business needs and provide them with experienced consultants for your projects and internal teams on a contract, contract-to-hire, and direct-hire basis. We provide IT talent strategies, recruiting, qualification, management, and placement services. Our ability to match and place the best resources for each client and to provide valuable project oversight on all our engagements are key elements to our project success and long-standing client relationships.

Procurement Service Contracts

IFG is a certified small business and Disadvantaged Business Enterprise (DBE) and has several contracting vehicles that give us an advantage in many opportunities. We also have the advantage of our understanding of and relationships with many State of California Agencies and Departments.

Our current contracting vehicles include:

- California IT CMAS
- California Master Service Agreement (MSA)
- California Service Leveraged Procurements (SLP)
- California Certified Small Business
- Federal Section 8(a) Certification
